

Name: Benjamin McDonnough

Technical Knowledge

Please rate yourself on a scale of 0-10 in the following areas. This information is used to get a general sense of your software development experience...so please be honest! Putting down a 0 for a technology about which you know nothing or have no experience is not an indication of poor performance.

Programming (which languages: C, C#, C++, Python, Java)	[8]
Cloud Computing	[7]
Web UI (eg HTML/CSS/Javascript)	[7]
Web application development (eg PHP/Ruby on Rails/React/JQuery)	[3]
Database development (which database: SQL)	[7]
Experience with Agile Project Management (outside of class)	[6]
Other Skills (CyberSecurity)	[9]

List any internships or computer related work experience?

I am a current employee at CCIT at the student help desk and have been working there for about two and a half years.

What one computer technology, which you don't know, would you like to learn about and use?

I would like to learn more about web application programs such as Ruby and PHP. I currently only know about JQuery for the web application development examples listed above.

Additional comments?
